Senior full-stack web developer with over 4 years of experience in developing enterprise applications. Expert in **Javascript**, **React**, **Vue.js** and **Node.js**; focused on the entire pipeline of delivering a product, from taking an initial concept to deployment; full-time learner with a fundamental awareness of data structures and algorithms. Specialized in developing SPA and PWA.

EXPERIENCE

Senior Full-Stack Developer

Legamart - *2020-10 / present (2 months) - contract*

- Used React, React hooks, CSS-in-JS solutions and Typescript to develop responsive user interfaces for Payment, Availability Service and Case-Review Service of Legamart.
- Worked with Product and UI/UX teams to develop Case-Review microservice of Legamart.

Front-End Tech Lead

Jabama - *2020-05 / present (8 months) - full-time*

- Leading a team of 4 to develop the front-end of the redesigned Jabama website.
- Contributed in developing the redesigned version of Jabama PWA.
- Contributed in developing the Admin Panel of Jabama website.
- Worked closely with Marketing and SEO teams and refactored the Jabama website to get higher traffic from search engines.

Full-Stack Developer

Jabama - *2019-09 / 2020-05 (9 months) - full-time*

- Contributed to developing the back-end of the search system of Jabama using Node.js, Nest.js, MongoDB, Redis and Elasticsearch.
- Developed the Referral system of Jabama.
- Contributed to migrating legacy monolith codebase to a microservices codebase.

Senior Front-End Developer

Jabama - *2019-05 / 2019-09 (4 months) - full-time*

- Communicated and worked closely with the Marketing and SEO teams to add analytical tools (Google Analytics/Hotjar) to the web application.
- Worked closely with Product, UI/UX, Back-end, and QA teams to develop a redesigned version of the Product Details Page, leading to a 1.5% increase in conversion rate.
- Maintained legacy codebase and contributed to fixing critical bugs.

Open-Source Projects

GoStreestTest
github.com/arashrasoulzadeh/GoStreestTest

A tool for stress testing REST endpoints. Written in Go programming language.

Jabama/vue-carousel
github.com/jabama-co/vue-carousel

Cloned from the popular vue-carousel repo, with some additional features such as vertical carousel and nested carousels included.

Nuxt-dto
github.com/farnabaz/nuxt-dto

Nuxt-dto is a Nuxt.js module developed to ease the communication with REST APIs, especially when your product still is in MVP stage and breaking changes to endpoints are inevitable.
